DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Y.C. Size on 06/24/05.

The application has been amended as follows:

In Claim 8, lines 27-30, "and a mounting wall and a set of wall mounting plates connected to the first set of parallel rods, to allow mounting of the positioning device to the mounting wall" should be changed to

--bushings attached to the two mounting plates, wherein the bushings slide over the first set of parallel rods, allowing the second set of parallel rods to travel along the first set of parallel rods between the two perimeter plates; and

a mounting wall and a set of wall mounting plates connected to the first set of parallel rods, to allow mounting of the positioning device to the mounting wall—.

Allowable Subject Matter

1. Claims 8-31 are allowed.

Regarding Claim 8, the prior art neither teaches nor fairly suggests a system for enlarging images, comprising: a positioning device, the positioning device comprises: a first set of parallel rods; a second set of parallel rods, movably mounted perpendicular to the first set of parallel rods; a carriage mounted for movement along the second set of parallel rods; a first motor coupled to move the second set of parallel rods along the first set of parallel rods; a second motor coupled to move the carriage along the second set of parallel rods, wherein the control panel actuates the first and second motors, wherein the first set of parallel rods contains left and right ends, and wherein the second set of parallel rods contains top and bottom ends; a control panel coupled to move the positioning device; a video camera, coupled to the positioning device, which provides a video output; a monitor, connected to the video camera, which displays the video output; a stage, on which material of any type may be placed, wherein the video camera films the material, and the monitor displays the material at a high magnification, a first perimeter plate, perpendicular to the first set of parallel rods, connected to the left ends of the first set of parallel rods, and a second perimeter plate, perpendicular to the first set of parallel rods, connected to the right ends of the first set of parallel rods, a first mounting plate, perpendicular to the second set of parallel rods, connected to the top ends of the second set of parallel rods; a second mounting plate, perpendicular to the second set of parallel rods, connected to the bottom ends of the second set of parallel rods; bushings attached to the two mounting plates, wherein the bushings slide over the first set of parallel rods, allowing the second set of parallel rods to travel along the first set of parallel rods between the two perimeter plates, and further comprising a mounting
